The pharmaceutical and IT industry is one of the strictest and most regulated markets out there. It makes sense, considering that the entire industry is built on procedures and double-checks to guarantee safe medicines. The downside, however, is that it made the market conservative without leaving any room for innovation. With all the recent technological advances, we're in a digital era where companies need to adapt to survive. So, it's only fair to say that we're experiencing the beginning of some significant changes in the pharmaceutical industry and IT industry.

India has glorious sericulture tradition of its own, which no other country in the world can share. Silk is indispensable in ceremonies and religious rituals, being a must in weddings and festivals. India traditional and culture bound domestic market and an amazing diversity of silk garments that reflect geographical specificity helped the country to achieve a leading position in silk industry. It is one of the most labor-intensive sectors, combining activities of both agriculture (sericulture) and industry. The webinar also highlighted on the study of nature and natural phenomena to understand the principles of underlying mechanisms, to obtain ideas from nature, and to apply concepts that may benefit science, engineering, and medicine.

Title: Seminar on NAAC revised framework

Date: 09th August 2019

Report: A seminar on NAAC revised frame work is organized by IQAC department of college. Dr. N. S. Dharmadhikari deliver lecture on this occasion. Dr. Dharmadhikari explain the revised frame work on the basis of increased use of information and communication technology in the learning process to make the education system scalable and robust, simplifying the assessment and accreditation process by reducing the number of questions, size of the reports, number of visit days and establishing benchmarks using NAAC indicators to improve the quality of education offered in India's higher education institutions. Benchmarks have been created using international QA frameworks.

Invitation

It gives us great pleasure while inviting you for the National Conference on 'Material Science: Advancement and Innovations (NCMSAI-2019) Department of Physics on 20 February 2019 at Dhule City of Maharashtra (India). This conference will certainly be one of the most exciting and prestigious National events in the field of Material Science.

Scope of the Conference:

The conference brings together Academicians, Scientists and industrialists in various disciplines to share knowledge and exchange their views and discuss wide range of topics on Material Science their advancement and innovations. The conference will facilitate discussion on latest advancement and innovations in material Science. Oral and poster presentations dealing with the various topics listed below will be included in the conference program. In addition to the contributed papers, the conference committee will include invited lectures by eminent researchers.

Topic of Interest:

Nano materials for chemical sensors, composite and ceramic materials, gas sensors, biosensor, advanced preparation methods of thin and thick films, constructional and engineering materials, environmental and green materials, polymer engineering, optical, electronic and magnetic materials. Bio-nanomaterials, Characterization of materials: XRD, SEM, TEM, STM, AFM, Raman Spectroscopy, XPS.

How To Reach Dhule City

Dhule is a district headquarters of Maharashtra state of India.
